

ABSTRACT

- 5 Aqueous hard surface treatment compositions necessarily comprise an alcohol constituent selected from the group consisting of methanol, ethanol, n-propanol, isopropanol, n-butanol, benzyl alcohol, and mixtures thereof which alcohol constituent comprises from about 40 and 70 weight percent ("wt") of the total weight of the composition of which it forms a part. Preferably however the alcohol constituent is present in an amount of from
- 10 about 50%wt to about 70%wt, more preferably is present in amounts of from about 60%wt to about 70%wt.
